

OPL 10 3.0

Order Picker

Order picking on new heights!

OPL 10 3.0 is a robust picker with large battery and low center of gravity. Plattform lift up to 3000 mm, provides an efficient picking height of 4600 mm. It has free hanging forks and can handle most types of load carriers. The forks can be raised and lowered separately or ordered welded into the platform. OPL 10 is available in three lift heights 1200, 2100 and 3000 mm.

Working environment All controls are positioned to offer varying driving positions. Dual controls are available as an option for those who want to stand and drive in the fork direction.

OPL 10 3.0 Lifts up to 3000 mm, which means that you can effectively pick on several levels. With protective roof and gates orderpicking can be done safely.

Working height The forks are adjustable to always have an optimal picking height. In the top position, the pallet is in perfect height so that the operator easily can put down goods without stretching.
